

Stockport Partnership Forum **"Shaping Stockport"**

Stockport Partnership Forum members met at Alma Lodge on June 17th in the evening. The topic was "Building a Society for All Ages."

The introduction included videos and a popular quiz game which used interactive voting buttons. Forum members then moved into groups to consider the opportunities which are presented by people living longer and the adjustments which are needed to make the most of these demographic changes.

This event was very well attended by representatives from community groups as the topic attracted interest from all ages. Young people and older people came together in groups and a record of their discussions will form part of the report which will be sent to the Stockport Partnership Board. A review of the evening will appear in the next issue of Stockport Partnership News.
